

LEARN, SPEAK, SHINE!

QUESTION OF THE DAY

- ✓ Every student answers one question.
- ✓ Builds confidence and gives equal chance to all.

SENTENCE FORMATION PRACTICE

- ✓ Create your own sentences.
- ✓ Improves grammar + vocabulary

SPEAKING ROUND

- ✓ Share your answers aloud.
- ✓ Boosts fluency & removes hesitation

FEEDBACK & CORRECTIONS

- ✓ Trainer guides on grammar & pronunciation.
- ✓ Encourages progress with positive motivation

English Proficiency Program

INTERACTIVE | PRACTICAL | CONFIDENCE-BUILDING

NOVEMBER 6

English Batch 02:30 PM

Tutor: Sapna Gupta

Pendown: Keen Learner

Question of the day

What do you understand by reaction and response?

- ❖ Explain the difference or meaning of the two terms — reaction and response.

Spotlight Theme: “Reaction & Response”

In simple terms:

 A **reaction** is an immediate, emotional, or instinctive action to something that happens.

Example: Someone insults you, and you shout back instantly — that’s a reaction.

 A **response** is a thoughtful, calm, and deliberate action after considering the situation.

Example: Someone insults you, and you take a deep breath and reply politely — that’s a response.

Understanding the Difference Between Reaction and Response *(Take ways from ref videos)*

❖ The Incident at the Restaurant

- A group of friends were enjoying coffee when a cockroach suddenly landed on one of them.
- The lady panicked and screamed, triggering similar reactions among her companions.

-
- Amid the commotion, a waiter calmly approached, observed the situation, and quietly removed the cockroach.

 *The incident symbolizes how unexpected problems can disturb our peace and test our emotional control.*

❖ **Reactions vs. Responses**

- The lady's reaction was immediate and emotional, driven by fear and discomfort.
- The waiter's response was thoughtful and composed—he analyzed the situation before acting.
- This contrast highlights that a reaction is impulsive, while a response is intentional and mindful.

Explanation:

- A **reaction** is quick, automatic, and often driven by fear, anger, or anxiety. It usually makes the situation worse because it lacks control and clarity.
- Emotions are contagious — when one person reacts negatively, it can spread chaos. Staying calm helps stabilize the environment.
- A **response** involves thinking, observing, and then acting wisely. It shows control over emotions rather than being controlled by them.

 *Key difference:* Reactions come from emotion; responses come from awareness.

❖ Handling Disturbances

- The real problem wasn't the cockroach—it was the inability to manage internal fear and stress.
- Similarly, in life, external challenges aren't as damaging as our emotional reactions to them.
- Shifting focus from the disturbance to our mindset helps us deal with problems more effectively.

 *Lesson:* Peace comes not from a problem-free life, but from mastering our reactions to life's problems.

❖ The Importance of Mindful Responses

- Thoughtful responses lead to better decision-making and emotional stability.
- Reacting impulsively can amplify conflicts, while responding wisely helps resolve them.
- Cultivating this awareness develops emotional intelligence, enabling us to stay calm under pressure.

 *Moral:*

- The story teaches that life's problems (like the cockroach) are not the real issue — our reaction to them is.
- If we stay composed and respond mindfully, we can handle any disturbance effectively.

Key Difference Between Reaction and Response

Aspect	Reaction	Response
Nature	Instinctive, emotional	Thoughtful, deliberate
Control	Lack of control	Full self-control
Timing	Immediate	After reflection
Outcome	Escalates the problem	Resolves the problem
Driven by	Emotion/Fear	Awareness/Understanding

Lessons Learned

- ✓ Reaction = Emotion first, thought later.
- ✓ Response = Thought first, emotion managed.

To live peacefully and handle stress effectively — pause, observe, and respond, instead of reacting blindly.

“It’s not what happens to us, but **how we respond that defines who we are.**”
